

# Must Have

AI help tool  
that provides  
real-time,  
contextual  
assistance

Simple, non-  
intrusive  
intervention  
mechanisms

Detection of  
common user  
interaction  
problems

Personalization  
options  
(potentially via  
school/organizational  
accounts)

Support for  
users with  
varying  
technical skills

Quick help  
access  
control

# Should Have

Gesture  
control  
explanations

Screen sharing  
preview  
features

Ability to switch  
between  
applications  
easily

Multiple  
screen  
interaction  
support

Voice control  
integration

Basic  
whiteboard  
functionality

# Could Have

Advanced AI  
features like  
sketch  
enhancement

Brightness  
and display  
settings  
controls

Emotion  
recognition  
capabilities

Detailed  
analytics for  
development  
teams

Bluetooth  
beaconing for  
device  
discovery

Customizable  
quick access  
controls

Multi-device  
connection  
options

# Won't Have

Complex  
hover state  
interactions

Extensive  
menu  
systems

Full-scale  
onboarding  
processes

Multiple  
whiteboard  
versions

Highly advanced  
AI sketch  
transformation

Comprehensive  
help center with  
extensive  
documentation
